OBJECTIVE

Second-year B.Tech Computer Science student seeking a data or AI internship to apply Python, SQL and machine learning basics to real problems.

EDUCATION

B.Tech, Computer Science and Engineering (2nd year)

[Your University], [City] | CGPA: 7.5

SKILLS

- **Languages:** Python, SQL, JavaScript
- **Web:** HTML, CSS, JavaScript
- **AI and data:** Basic machine learning, data analysis, prompt design
- **Tools:** n8n, Git and GitHub, Google Sheets

PROJECTS

OpportunityPilot: AI agent for internship tracking (hackathon project)

- Built an n8n workflow that reads placement emails, extracts company, role and deadline with Gemini, and scores fit against a student profile.
- Logs opportunities in Google Sheets, sets Calendar reminders, and saves AI-drafted application emails in Gmail for review.
- Added a daily Telegram digest of deadlines due in the next 7 days.

[Project 2 name]: [one-line description]

- [Add what you built and the result]

ACHIEVEMENTS AND ACTIVITIES

- Participant, hackathon Round 2 (idea submission and team lock), 2026
- [Add a course, certification or club role]
